

Foreword	xi
Acknowledgments	xiii
1. Introduction	1
2. Theoretical Background	3
3. Symmetry Analysis Procedures	11
Introduction	11
Definition of the Symmetry of Plane Patterns	12
Nomenclature of the Symmetry Classes	15
Procedure of Analysis	18
4. Generation of Symmetry Classes in the Three Categories of Plane Pattern Design	23
Generation of Finite Patterns	23
Generation of One-Dimensional Infinite Patterns	25
Generation of Two-Dimensional Infinite Patterns	26
5. Symmetry of Upper Gila Finite Designs	46
Symmetry of Structure and Symmetry of Whole Design	46
Functions of Motifs	51
Symmetry of Motifs and Fillers	52
6. Symmetry of Upper Gila One-Dimensional Designs	56
Symmetry of Structure and Symmetry of Whole Design	56
Symmetry of Motifs	107
Symmetry of Fillers	113
7. Symmetry of Upper Gila Two-Dimensional Designs	119
Symmetry of Structure and Symmetry of Whole Design	119
Symmetry of Fillers and Motif-Units	135
8. Symmetry of Trim Designs	136
Ladle Handles	136
Pitcher and Jar Necks	141
Exterior Designs on Vessels with One-Dimensional Designs on Vessel Interiors	151
Exterior Designs on Vessels with Two-Dimensional Designs on Vessel Interiors	162
9. Analysis and Interpretation	165
Methodology of Analysis	165
Intersite Analysis	168
Intrasite Analysis	173
Conclusion	185
Bibliography	190
